PMI-PgMP: Program Management Professional:

INTRODUCTION

With business going worldwide, work performed to meet these business goals is also going worldwide. With innovations all over and ever-changing stakeholders in such a Volatile, Uncertain, Complex, and Ambiguous environment, it is becoming increasingly difficult to perform in such a business environment efficiently and effectively

Program management is increasingly recognized as a skill that enables organizations and individuals to achieve strategic goals and induce organizational transformations in a high level of uncertain and ambiguous business environment.

The program manager has significant responsibilities and must maintain a strong collective strategic vision. They supervise project managers, ensuring the commitment and satisfaction of stakeholders and ensuring that the benefits are obtained and transferred to operations in a sustainable manner. Hence it is becoming an essential skill for middle-level management.

The PMI-PgMP Program Management Professional credential recognizes the advanced experience, skill, and performance in overseeing multiple related projects and their resources aligned with an organizational objective. PgMP credential holders oversee the success of a program – a way to group multiple related projects to achieve benefits that may not be realized if the projects were managed in a standalone fashion.

As project managers advance in their careers, the experience they gain in managing multiple, related projects and making a decision that advances strategic and business objectives demonstrates this competence. As employers demand program managers who can support the organization's strategic objectives, PgMP credential holders will gain a distinct advantage in employment and promotional opportunities over their peers. This also helps project managers expand career development opportunities.

ACEPRO PMI-PgMP preparation course helps the participant develop insights into program management as per PMI Program Management Standard – Edition 4, exam specifics, the type of questions that you can expect in the exam, and how to apply critical thinking towards arriving at the most appropriate answer.

This is an integrated, end-to-end course until you get certified as PMI-PgMP. – This includes online Instructor Led synchronized training, assignments, mentoring, participation in discussions with other participants, and application development, and leads you to successful PMI-PgMP certification with about 150-200 hours of effort over 3-4 months

THE TRAINING OBJECTIVE:

1. To equip participants with program management knowledge as defined by PMI (Project Management Institute, USA) Standard for Program Management Version-4 (SPMv4) and preparation towards passing the PMI PgMP exam.

DELIVERY:

1. 34 hours of ILVC (Instructor-Led Synchronized Virtual Class) discussion-oriented training
2. Online collaboration tool: GoToMeeting from Citrix
3. Recorded sessions Audio/Video for later viewing.
4. Online access to Courseware, session videos, other study aids such as PgMP formulae, Exam analysis videos, application development guidelines, and samples through www.AceproConsulting.com
5. PgMP application review assistance with templates, samples, and leading questions and feedback
6. 6-month access to 850+ questions through the simulator, organized into domain-specific practice questions and two mock exams of 170 exam-type questions
7. Post training support by mail/ group online meetings.
8. Membership in the Program management WhatsApp community
9. Study plan support
10. Course completion certificate
